OBJECTIVE

Web developer looking for an entry-level role at a company that builds powerful products.

EDUCATION

Full Stack Web Developer Bootcamp, Integrify 2023

Built Full Stack projects using the MERN stack: MongoDB, Express, React (TypeScript), & Node.js.

M.Sc. Computer Science (GPA 4.0), Stockholm University 2022

With a specialization in immersive technologies and the highest achievable GPA, I gained practical knowledge in areas such as Machine Learning, Virtual Reality, & the Internet of Things.

B.Sc. Computer Science, Stockholm University 2018

With a specialization in digital media, I gained knowledge in areas such as Java, Processing, & Human-Computer Interaction.

Exchange Studies, The Berlin School of Economics & Law 2017

Broadened my knowledge in areas such as Business Administration, Marketing, Micro- & Macroeconomics.

SKILLS

Expert Systematic, Self-Driven, Organized, & Ambitious

Proficient HTML, CSS, TypeScript, JavaScript, React, Tailwind, Git, Figma, & Python

Novice Express, Prisma, & MongoDB

EXPERIENCE

COO & Co-Founder Sep 2020 - May 2021
AI Medical Technology *Stockholm*

- Worked strategically and executed tasks within R&D, regulatory compliance, clinical research, and business administration to secure € 380K seed funding for Dermalyser, an AI-powered clinical decision support.
- Recruited a board, clinical advisory, and AI developer.
- Built version 1 of the AI algorithm.

User Researcher Intern Jun 2020 - Sep 2020
Spotify *Stockholm*

- Planned, scoped, and executed a joint research insights initiative together with a data scientist trying to understand how 300 million active users could be served a better experience finding and discovering new releases of the artists they love.
- The research was selected as a company-wide core piece of knowledge concerning music discovery.

User Researcher Jan 2018 - Nov 2018
YEAY *Berlin*

- Responsible for the end-to-end user research process involving weekly user tests, interviews, surveys, and field studies.
- Adopting my work to a fast-moving start-up culture enabled users to be let into discussions and decision-making through clear and actionable insights.

PROJECTS

Solenergiteamet.se - Building a Full Stack customer-facing web application for a company in the solar energy industry. Stack: React, Tailwind, Next.js.
